## What is GLCyberBooth

The GLCyberBooth solution enables service providers to use voice over IP (VoIP) technology to deploy long distance telephony services easily and cost efficiently in various locations such as in-store phone booths, call shops or internet cafes.

It combines all the benefits of a traditional phone booth service with the affordability and portability of VoIP technology.

## How it works

Because all communications are executed with VoIP, telephone calls can be placed from any GLCyberBooth. The phone booth can be installed anywhere in the world that provides internet connection. Customers would purchase GLCyberBooth cards with various credit amounts defined in units (200, 500, 1000 & 2000 units) and use the CyberBooth phones in various locations to make long distance calls. Users would simply need to pick up the phone, enter the PIN printed on the back of the card and place calls worldwide at our competitive rates - no access number entry is required.

## Benefits

GLCyberBooth is a Pay-as-you-talk VoIP service. You can enjoy all the features and benefits of VoIP as well as budget your phone expenses, all while avoiding extra fees. You will never have to dial a long access number again. GLCyberBooth services are available worldwide and give consumers the ability to take control of their phone usage. It is an easy, flexible and cost effective way to call locally or internationally at low costs.

## GLCyberBooth at a glance

- No contracts and commitments
- No hidden fees
- Low competitive rates
- No longer required to dial access numbers

## Booth cards

GLCyberBooth calling cards are available in various denominations and can be purchased and used without any sort of account facility. Each card is assigned a fixed amount of credit and is to be discarded after use.

### Group of Gold Line

The Group of Gold Line (GL) is a Canadian company specializing in the research, development, marketing and worldwide distribution of telecommunication solutions and technology products. Its portfolio ranges from telephony, web to print, digital printing, WebTV and educational technologies.

Founded in 1991, GL has evolved to become the largest provider of prepaid long distance products and services in North America, with over 300 million minutes of long distance calling per month. Its products are distributed in over 50 countries, with approximately 100,000 points of sale around the world.

GL's mission is to connect people around the world to what matters and bring them closer to their family, business, culture and languages through innovative, unique and competitive technology-based products and services.
