## ABOUT GLCLOUDCONNECT

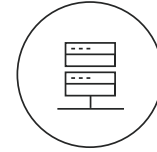

GLCloudConnect is a cloud-first strategy that enables businesses to use today's technologies in addressing today's business challenges and opportunities. We do that through a comprehensive cloud portfolio built around three distinct groups of applications, Communications, Outsourced Customer Care and Data Centre Hosting Services leveraging GL2CLOUD's Geo-redundant and fully certified Data Centre facilities (Tier 3, Type II SOC 2 and PCI DSS certifications).

**CLOUD COMMUNICATIONS**

**OUTSOURCED CUSTOMER CARE**

**DATA CENTRE HOSTING SERVICES**

With cloud being the common thread to our offerings, your business has new-found flexibility to move from the constraints of legacy technology. Each GLCloudConnect offering stands on its own to address your specific needs; our solutions are highly complementary and can readily be combined, at once or in phases over time. Whether your technology vision is about cloud migration, adopting new IP-based service, or embracing digital transformation, GLCloudConnect can be your ideal partner.

## WHY GLCLOUDCONNECT

By partnering with GLCloudConnect, you can level the playing field to compete against the largest competitors, and to offer your customers innovative alternatives to the mainstream technology offerings. This is especially important for cloud services, where GLCloudConnect is 100% Canadian-owned, and our data centre infrastructure is entirely located in Canada.

Doing business with GLCloudConnect is no different, as our partners find our customer-centric culture a real point of distinction, especially compared to foreign-based companies who only have minimal support

presence in Canada. The human touch is one of our hallmarks, as we value each and every partner relationship, and we know how important it is to be easy to do business with you.

Finally, we're just getting started. Our parent, Gold Line, is a true Canadian success story, and views the cloud as an untapped growth opportunity. Investments will continue to be made to expand our portfolio, and provide more resources to help our partners be successful. Are you ready to follow us into the cloud?

## PRODUCTS

It's a balancing act, but for many companies today the potential benefits outweigh the perceived risks, especially as UC platforms can be the catalyst that helps make the connected enterprise a reality. So, how can businesses start to put in place the building blocks of the connected enterprise by using unified communications technology together with the latest customer interaction technology? GLCloudConnect's portfolio addresses all of your customer experience needs. Being cloud-based, our solutions provide agility and flexibility for you to engage your customers how, when and where they want to engage your business.

### Group of Gold Line

The Group of Gold Line (GL) is a Canadian group of companies specializing in the research, development, marketing and worldwide distribution of telecommunication solutions and technology products through four lines of business: Telephony, Web2Print, WebTV and Business Solutions.

Founded in 1991, GL is today the largest provider of prepaid long distance products and services in North America, selling over 300 million minutes of long distance calling per month. GL is also the world's largest provider of multicultural IPTV programming and operates the world's largest multicultural ad exchange. GL also offers hosting services through its state of the art data centre in its head offices in Markham, Ontario. GL's products are distributed at approximately 100,000 points of sale, by over 1000 resellers (GLAgents) in over 50 countries.

GL's mission is to connect people and bring them closer to their family, business, culture and language through innovative, unique and competitive technology-based products and services.
